ST-6121
Stark RFID Tag, Arm/Disarm.

Features:

ST-6121 RFID tag utilizes an induced antenna with coil voltage for operation.

The memory chip on the tag contains a unique identification code,

which can be sent securely when placed in close proximity of the RFID reader of control panel.

The ST-6121 RFID enables users to arm and disarm the alarm system.

Main Features

● Arm/ Disarm alarm system
● Name every RFID tag for different users.
● Convenient to carry and use
